

VACCINATION CALENDAR (ROMANIA)

This parent-friendly calendar is an educational tool and should not replace the child's vaccination card. Parents can use it to check into the table when the vaccine shot had been administered. This way they might have a clue when they should schedule the next consultation at the general practitioner for the next shot. These vaccines are provided free of charge for children through the National Public Health Program and are in agreement with the National Vaccination Calendar.

RECOMMENDED AGE	VACCINE	COMMERCIAL NAME	WHERE?	YES /NO
